Evaluation

Tina Cowley Reading Centre Midstream initially performs a reading evaluation to determine the reading level of a learner. All aspects of reading are evaluated. Our experience has proven that reading itself as well as reading skills need to be improved before one can establish and notice improvement in academic level. We also conduct a basic reading evaluation with our students who cannot read yet to determine dominance and strength of the eye muscles.

What do the classes entail

Once it has been established whether a pupil should be enrolled at the reading center, the student will attend the center once a week for an hour and a half (45 minutes are allocated to reading therapy, spelling and comprehension skills and the other 45 minutes are dedicated to memory method therapy, brain gym and handle therapy)

We focus on all the necessary skills to improve reading speed, comprehension skills, spelling, sound recognition and basic reading skills, which include form perception, sequencing, position in space and auditory skills. Eye exercise are done on a weekly basis at every class
